

New Roselily pictures

This year some new unique Roselily varieties are available in the colors; white, hot pink and light pink. There have been made great quality pictures of these varieties. Also the results from our own greenhouse are presented beneath the picture of each variety. Please [click here](#) to view our complete Roselily assortment.

New packing machine

Van den Bos is going to replace her current packing machine and we are extremely happy with the benefits this brings for all factions. The new packing machine will be automated completely, this also apply to scanning, stickering and so on. The advantages of the new packing machine is that we can accelerate the packing process, the dabble time will be longer and the quality of the packing will be improved. The last one because of the change of filling, so the vemosveen will be divided better in the crate.

O.T. Amarossi® is promising

Amarossi® is one of the VandenBos favorites in the dark pink O.T.-segment. The lily has a good bud presentation and is a healthy grower. The growing speed of Amarossi® can be called quick with 12 weeks. Are you interested in this beautiful O.T.? Please contact your sales representative.

Insights Southern Hemisphere Crop 2016

The quality of the bulbs in Chile is on a continuous rise and presents itself better than last year. The average virus level has decreased and the quality of the bulbs is good. The Orientals had less growth and are only available in small sizes. The OT's had a normal growth and good yields. This is a general observation and not region based.

Cultivation guides online

On our website we provide cultivation guides for the cut –and pot lily. We have them available in six different languages (English, Spanish, Chinese traditional, Chinese simplified, Vietnamese and Russian). You can find them on our website under the button “Downloads”, or you can [click here](#) to download the cultivation guides directly.
